

Pauntley Street planting project

Consultation results and next steps

We are pleased to share with you the outcome of the Pauntley Street environmental improvement consultation which ran from 30 November to 28 December 2022.

As part of our mission to make our borough a cleaner, greener, healthier place we proposed installing a 2.2m tall living green screen (similar to a hedge in planter boxes) on a 50m stretch of the Pauntley Street footpath marked 'A' on the map below. We also asked for your ideas on what could be done to improve the car park towards the north of Pauntley Street (marked 'D' on the map below).

Thank you to everyone who shared their views

Key findings from the consultation

We received 65 responses to the consultation and have listened closely to your suggestions for the Pauntley Street footpath and car park.

You told us

You said that you would prefer the living green screen to be made with timber rather than steel planter boxes.

You said that you wanted the living green screen to cover the full length of the bus stands on Archway Road.

You said that you are concerned about the living green screen being too tall and making it difficult for people on the footpath to be seen.

We listened

We are installing a living green screen in timber planter boxes. You can see an example in Figure 2 on the next page.

We are extending the length of the green screen to cover the full length of the bus stands on Archway Road.

We are decreasing the height of the living green screen to 1.5m so you can see over it.

Popular suggestions for the car park included greening and upgrading the bin storage to improve the look and feel of the space and to deter fly tipping. We will be conducting further feasibility studies to explore options for this space.

Works to enable the improvements:

The installation of the living green screen is scheduled for the week of

13 March 2023.
