

Instructions to connect to StreetNet from your laptop

The following instructions are for laptops running on Windows XP with in-built Wi-Fi. These instructions are for use as a guide only, individual machines may operate differently. Please refer to manufacturers guides for full instructions.

Security - It is recommended that you have up to date anti-virus software and a firewall installed and running on your pc before you connect to the Internet. LBI and CitySpace cannot be held responsible for the content of Internet sites outside of its control.

Connecting to StreetNet

StreetNet is available along Upper Street, between Highbury Corner and Angel.

1. Activate your laptops Wi-Fi power by pressing the wireless power button. The button will show the universal symbol for Wi-Fi as displayed here.
2. Click "Start"
3. Click "Control Panel"
4. Select Network and Internet connections (If your laptop is set to display "classic view" go straight to 5)
5. Select Network Connections
6. Right click "Wireless Network Connection"
7. Select "View available wireless networks"

This will bring up a list of available wireless networks in range. You must be in range of a StreetNet wireless point to connect. If StreetNet is available, double click to connect to StreetNet.

Connecting to the web

1. Click "Start"
2. Select "Internet Explorer"
3. The following pop-up will appear

4. Select "Yes" to continue
5. The StreetNet front page will appear. Click on "Free Internet access"
6. Click "Login" to begin
