## Making CO<sub>2</sub> reduction count for your business

# Welcome to the Islington Climate Change Partnership

The Islington Climate Change Partnership (ICCP) is a membership initiative, bringing businesses and other organisations together to reduce CO<sub>2</sub> emissions in the borough of Islington.

In a world of rising energy prices, expanding environmental legislation, and wide spread public awareness of climate change, carbon reduction is increasingly a business priority. The ICCP offers a unique opportunity to engage at a local level, work collaboratively to maximise cost savings, demonstrate leadership and take advantage of new opportunities created by the low carbon economy.

With a borough-wide carbon reduction target more challenging than that of national government, Islington is a leading low carbon borough. By joining us you can not only maximise cost savings and environmental improvements for your own organisation but play a vital part in achieving this target.

Launched in 2007, we already have over 200 members from across the borough. Join us today and help make a difference that counts.

**Tony Upson, Slaughter and May**  
Chair of the ICCP

Being part of the ICCP has given us a practical framework to work within and reduce our environmental impact. The help of the ICCP team has been invaluable.

## Key member benefits

### Save time and money

Our free energy auditing and advice service for SMEs, and exclusive member discounts will save you time and drive down costs.

### Learn, network and meet new customers at our events

Our locally run 'expert events' programme includes training, technical seminars, topical debates, interactive workshops and tours.

### Raise your profile and promote your business

As a member, you can demonstrate your commitment to the ICCP through use of our logo on communications giving you a clear differentiator for your business.

### Demonstrate leadership

Membership of the ICCP sends a clear signal that you are a responsible organisation that takes CO<sub>2</sub> reduction seriously.

### Measure, report and make it count

Get guidance on CO<sub>2</sub> monitoring and free access to our online monitoring and reporting software so you can keep track of your progress.

### Make a real contribution at a local level

Become part of a growing network of leading businesses supporting Islington to achieve its challenging 40% by 2020 CO<sub>2</sub> reduction target.

We needed assistance and guidance on a whole range of issues and felt that the ICCP could offer both.
