Remember to steer clear of cycle theft....

Lock both wheels and frame

Buy a good lock (and preferably two).
When locking your bike, keep the lock off the ground.

Lock it responsibly

Lock to a stand or a strong immovable object (try not to use lamp posts).
Make the lock and bike hard to move – make it hard for a thief to reach your lock.

Register it

Keep a record of your frame number and register it at www.immobilise.com so the police can easily recover your bike if it is stolen.
