¹Montem and Samuel Rhodes Primary are located in the same site and as such have the same air quality monitor

²The Pears Family School have a permanent site on Rodney Street but at time of measurement were in a temporary site, we are therefore using the monitoring from The Gower which is located in the same block but for future data will have a more accurate location.

³Richard Cloudesley Primary and Prior Weston are located in the same building and as such have the same air quality monitor.

⁴Richard Cloudesley Secondary is in the same site as City of London Academy and as such have the same air quality monitor.

⁵The Bridge Primary is in the same site as Hungerford Primary and as such have the same air quality monitor.

⁶City of London Academy is in the same site as Moreland and as such have the same air quality monitor.

⁷Arts and Media School and Christ the King are close to each other in location and as such we are therefore using one monitoring tube for both.

⁸For 2018 there is only one monitor for the whole of St Mary Magdalene Academy (nursery, primary and secondary). We have since increased this monitoring.

⁹Modelling is for the site on Lough Road, we are using the monitoring from St Mary Magdalene which is just down the road. We currently don't have monitoring at the other sites.
