Dear Sir, Ma'am

Further to your letter 05 September 2019 I would like to make the below representation regarding the proposed submission Arch5 – The Archway Campus, Highgate Hill N19

I am in favour of bringing the existing building back in to use as proposed but still feel the proposed development attempts to over use the space available offering cramped poorly proportioned developments. I would like to see the overall density of development reduced. I am most concerned about the plans to build directly adjacent to Whitehall Mansion and feel that this would pose a serious fire risk. I am also concerned that building in such close proximity to Whitehall Mansions would undermine the structural integrity of the old buildings at Whitehall Mansions. I feel that the proposed building of new developments would likely cause a significant amount of noise pollution both during construction and once occupied as presently this wall does not have an adjoining property.

I would like the current cycle path to be preserved and consideration to cycling given throughout.

Many thanks for your consideration

Kind regards
