## Vaccinations

Indicator	Indicator Name	Last week	This week	Direction of travel	Commentary
4	Vaccine uptake - aged 16+ - number	153969	154819	Increasing	So far, there have been 154819 people aged 16+ have been vaccinated so far
5	Vaccine uptake - aged 16+ - percentage	60%	60%	Increasing	60% of the borough's 16+ population have been vaccinated so far
6	Vaccine uptake - aged 16-49 - number	104906	105724	Increasing	So far, there have been 105724 16-49 year olds vaccinated
7	Vaccine uptake - aged 16-49 - percentage	53%	54%	Increasing	54% of 16-49 year olds have been vaccinated so far
8	Vaccine uptake - aged 50+ - number	49063	49095	Increasing	So far, there have been 49095 50+ year olds vaccinated
9	Vaccine uptake - aged 50+ - percentage	80%	80%	Increasing	80% of people aged 50 and over have received vaccines

## Cases

Indicator	Indicator Name	Last week	This week	Direction of travel	Commentary
10	Cumulative number of cases	25470	25876	Increasing	In total, there have been 25876 cases of Covid 19
11	Total number of cases	379	406	Increasing	This week there have been 406 new cases of Covid 19, this is up by 27 since last week.
12	Pillar 1 cases	57	51	Decreasing	This week there have been 51 cases diagnosed through Pillar 1, this is down by 6 since last week.
13	Pillar 2 cases	322	355	Increasing	This week there have been 355 cases diagnosed through Pillar 2, this is up by 33 since last week.
14	Incidence per 100,000 population	153	164	Increasing	164 new cases have been diagnosed, per 100,000 residents
15	Cumulative crude rate	10206.6	10366.6	Increasing	10366.6 cases have been diagnosed, per 100,000 residents, since the start of the pandemic

## Testing

Indicator	Indicator Name	Last week	This week	Direction of travel	Commentary
16	Percentage of individuals who tested positive	3%	3%	No change	This week 3% of people tested this week were positive for Covid 19, the same as last week
17	Individuals tested per 100,000 population (includes pillar 1&2 tests)	785.1	785.1	No change	This week 785.1 people per 100,000 have been tested, the same as last week

## Contact Tracing

Indicator	Indicator Name	Last week	This week	Direction of travel	Commentary
18	Number of cases via NHS test and trace (cumulative)	22119	22478	Increasing	In total, there have been 22478 cases contacted through the Test and Trace system
19	Proportion of cases successfully contacted (cumulative)	86%	86%	Decreasing	To date, 86% of cases successfully contacted through the Test and Trace system
20	Number of contacts via NHS test and trace (cumulative)	46188	47776	Increasing	In total, there have been 47776 contacts identified through the Test and Trace system

**Other**

Indicator	Indicator Name	Last week	This week	Direction of travel	Commentary
22	R Number for London	0.9 to 1.1	0.9 to 1.1	No change	If the R number is above 1 then the number of cases are going up, if it's below 1 the number of cases are falling across the region.

Indicators 1-3 (COVID-19 deaths): Deaths data are reported with a weeks lag. Deaths by cause of death (weekly numbers and cumulative), for deaths that occurred up to 8 January 2021 but were registered up to 16 January 2021 by week

Indicator 14 (weekly incidence per 100,000 population): This indicator is RAG rated: Maroon >250 cases per 100,000, Dark red 151 to 250 cases per 100,000, Red 51 to 150 cases per 100,000, Amber 25 to 50 per 100,000, Green 150 cases per 100,000, Dark red 101 to 150 cases per 100,000, Red 51 to 100 cases per 100,000, Amber 25 to 50 per 100,000, Green 7.5%, Amber 4% to 7.5%, Green

Indicator 16 (Percentage of individuals who tested positive): This indicator is RAG rated Red >7.5%, Amber 4% to 7.5%, Green

Indicators 16-17: These indicators are using PHE's adjusted approach to testing metrics. Individuals with a positive test are deduplicated across the pandemic. Individuals with a negative test are deduplicated across the preceding 7 days, to exclude repeat negative tests arising from recent multiple testing

Indicator 22 (R number for London): The estimate for the R number is updated on a slower timescale than other indicators. Low case numbers and/or a high degree of variability in transmission across the region means these estimates are insufficiently robust to inform policy decisions
