

A realistic look at council housing and your options

We want to be realistic about your chances of being housed or rehoused. Not many properties become vacant each year.

Last year we only let **1017 properties**, housing **just 7%** of people on the housing register.

Nearly **half** of these homes **were studios or one-bedroom properties.**

Many people have told us that if they realised how long the wait for council housing is, they would have considered other options when they first applied, like swapping homes or renting privately.

Average number of points needed for properties in 2017/18

What are my options?

Housing Moves

housingmoves.org

Housing Moves helps tenants to move to another part of London to be nearer to family or friends, move to a smaller home or to be nearer work or training.

a new home on Homefinder UK?

Find out more about your housing options online:

If you are a council or housing association tenant:

www.islington.gov.uk/movinghome

If you are not a council tenant: www.islington.gov.uk/findingahome

If you are homeless or threatened with homelessness:

www.islington.gov.uk/homeless

We want to carry on letting as many homes as possible to people in need. That's why we are building new council homes, supporting tenants to swap their homes with others and freeing up family-sized homes by supporting tenants to downsize.
