1. Introduction

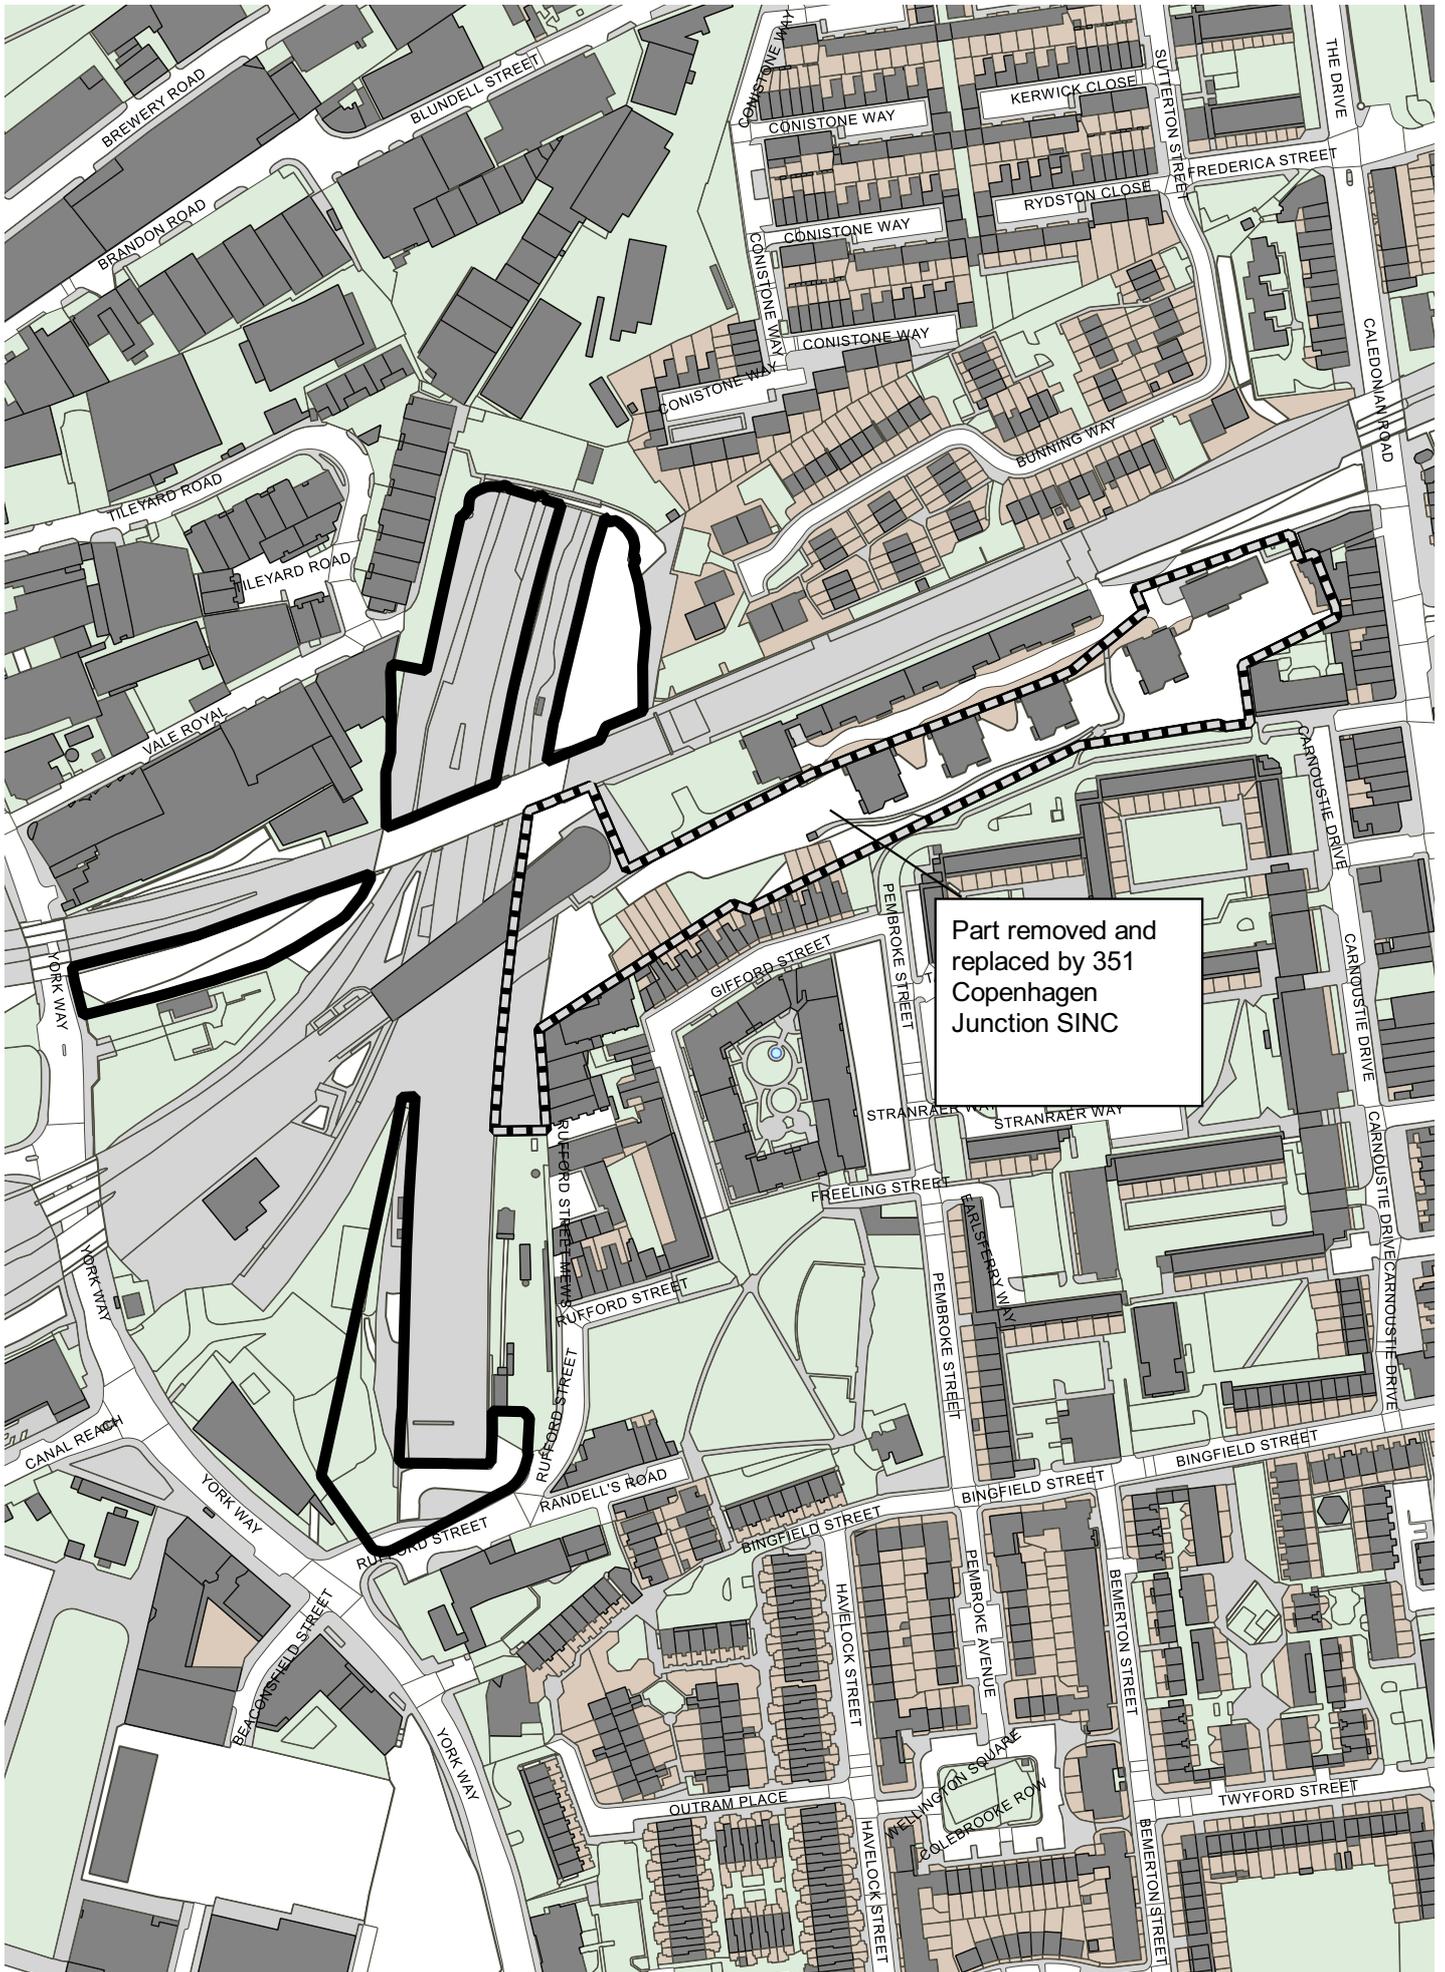

- 1.1 This document sets out the proposed changes to Policies Map designations that have arisen since the end of the Regulation 19 consultation. These map changes are set out in the Schedules of Modifications for the Local Plan where relevant, but are also set out in this document with additional detail. These map changes are in addition to those set out in following document:
 - [Policies Map changes from adopted Local Plan, Proposed Submission \(Regulation 19\)](#) in the Examination Library (document reference PD6, September 2019)
- 1.2 The Council proposes that the changes set out in these documents will made to the Islington Local Plan Policies Map.
- 1.3 This document supersedes the following document:
 - [Policies Map Changes, Examination addendum January 2021](#) in the Examination Library (document reference PD5a, March 2021)
- 1.4 Further information on the new Local Plan can be found at the Council's website: www.islington.gov.uk/localplan

2. Amendments to Sites of Importance for Nature Conservation (SINCs)

351 Caledonian Road

- 2.1 The SINC boundary for 351 Caledonian Road has been amended for the following reasons:
- The residential gardens on Gifford Street have been retained as SINC (they are currently designed as SINC under the Copenhagen Junction designation). At Regulation 19 stage it was proposed to exclude these gardens due to the limitations on managing private residential gardens as SINC however these gardens benefit from a bespoke management agreement outlined in the s106 agreement for the development of 351 Caledonian Road (2014/0609/FUL) to use the gardens in a manner to promote their nature conservation and biodiversity value (the Gifford Street Agreements).
 - The boundary around the buildings on site and around the entrance to the site has been amended for improved accuracy. This has been possible due to updated Ordnance Survey Mastermap mapping which includes the development on site and receipt of a Habitat and Biodiverse Roof Plan. This revised boundary also includes a small curved parcel of SINC value land at the north east of the site near the entrance of the site.
The western boundary has been extended west to adjoin the railway line. This covers the SINC designation currently part of the Copenhagen Junction designation. This area was not included in the replacement 351 Caledonian Road designation in error and has therefore been reinstated.
- 2.2 Refer to main modification SDMP56 in the Strategic and Development Policies modifications.

Skinner Street Open Space SINC

Skinner Street Open Space is a Local SINC identified in the existing Local Plan and Policies Map. Due to a database error this space was omitted from the Regulation 19 Policies Map. The SINC is not proposed to be de-designated and no change of status was proposed in the Islington Sites of Importance for Nature Conservation (SINC) Review (EB8 in the Examination Library).

Also refer to main modification SDMP56 in the Strategic and Development Policies modifications.
